## LIFE

### Elementary school 2013 - 2021

I went to elementary school near Prague. In fifth grade, I became interested in programming and learned to program simple applications in Python.

### High school 2022 - 2023

After ninth grade, I entered high school, and at that point I started to focus more on programming, especially web development. However, with the rise of ChatGPT, I became interested in the workings of artificial intelligence and started to get into data science as well.

### Germany 2023 - 2024

In the summer of 2023, I went to Germany for a year as an exchange student, where I lived in Göttingen and attended Felix-Klein-Gymnasium.
